To the Zoning Board,

I am a senior citizen requesting a variance approval to install a patio cover in my driveway. The cover is necessary to protect my vehicle from extreme heat. This measure will significantly reduce the risk of heat exposure and potential heat stroke when I enter my car. As a senior, these precautions are vital for my health and well-being. I kindly ask for your understanding and approval.

Thank you for considering my request.

Nature of project/use: Attached metal carport over existing driveway,  
Measuring 16ft width,  
18ft length,  
20ft height.

This project is estimated to take 40 hours, or two working days.

Sincerely,

Dina Majano
