Las Vegas Planning and Zoning Department

Subject: Justification for Establishing Thrive Point High School – A High School for Grades 9-12 in Las Vegas, Nevada

Dear Members of the Las Vegas Planning and Zoning Department,

I am writing to present a comprehensive justification for the establishment of Thrive Point High School, a dedicated high school serving students in grades 9 through 12 at 3802-3810 Meadows Ln, Las Vegas, NV 89107.

1. **Mission Statement and Educational Philosophy:**

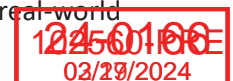

At Thrive Point High School, our mission is to accept each student as a unique individual and to foster the development of the whole person. We are committed to providing a quality education that ensures every student receives a solid foundation with strong core academic skills. Our dedication to a safe learning environment is unwavering.

Furthermore, we aim to expand international awareness and intercultural understanding through literature, art, music, and foreign language studies. By doing so, we strive to broaden perspectives and create global citizens.

Our mission extends beyond academics; we seek to increase each student's confidence, encourage character development, instill a desire to be a lifelong learner, and inspire them to become contributing members of society. Thrive Point High School is more than an educational institution; it is a community that nurtures the holistic growth of every student, empowering them for a successful and meaningful future.

2. **Holistic Educational Approach:**

Thrive Point High School adopts a holistic approach to education. Our curriculum is designed to offer a well-rounded educational experience, combining traditional subjects with contemporary, real-world

applications. We seek to nurture creativity, curiosity, and a love for learning among our students, with dedicated faculty employing diverse teaching methodologies to meet individual needs.

3. **Key Features and Programs:**

- **College and Career Readiness:** A strong emphasis on college and career preparation through partnerships with local businesses, internships, and mentorship programs.
- **Small Class Sizes:** To provide personalized attention and cultivate meaningful teacher-student relationships. With one main classroom on site and one lab space.
- **STEM Education:** Robust programs in science, technology, engineering, and mathematics to prepare students for the demands of the modern workforce.
- **Arts and Humanities:** Comprehensive arts and humanities programs to encourage creativity, expression, and cultural understanding.
- **Community Engagement:** Active involvement with the local community through service projects, events, and partnerships, creating socially responsible and engaged citizens.
- **Technology Integration:** Utilization of cutting-edge technology to enhance the learning experience and prepare students for a technology-driven world.
- **Inclusive Environment:** A commitment to diversity, equity, and inclusion, ensuring that every student feels valued and supported.

4. **Attendance Model:**

In response to the evolving needs of our students, Thrive Point High School employs an innovative attendance model. Students engage in online learning and may attend sporadically throughout the day. This flexible structure is designed to accommodate individual learning preferences and optimize the educational experience for each student.

5. **Facility and Enrollment Goals:**

Thrive Point High School anticipates having approximately 5-8 faculty members. with not typically more than 15-30 students present at any given time. Most students are either dropped off or arrive via public transportation, contributing to a sustainable and efficient traffic flow in the surrounding area.

As part of our commitment to creating a dynamic learning environment, we plan to incorporate around 15-20 desks in an open space, fostering collaboration and flexibility in student interactions. This design element is intended to encourage teamwork, creativity, and a sense of community among our students.

6. **Commitment to Collaboration:**

02/23/2024

As the representative of Thrive Point High School, I am eager to collaborate closely with the Las Vegas Planning and Zoning Department and the community to ensure the success of our school. Open lines of communication and transparency will be maintained throughout the establishment process.

For further inquiries or to schedule a discussion, please feel free to contact me via email at PetersConsultingAZ@gmail.com or by phone at 623-707-9292.

In conclusion, the establishment of Thrive Point High School is a strategic and well-thought-out initiative to contribute positively to the educational landscape in Las Vegas. I appreciate your consideration of this proposal and look forward to the opportunity to discuss further and address any questions or concerns you may have.

Thank you for your time and consideration.

Sincerely,

Shane Peters Representative for Thrive Point High School
