**Letter of Justification**

Due to the strong temperatures in the city of Las Vegas, thinking about the health and protection of myself and my family, I built a porch on the left side of the patio to park my vehicle escaping the sun.

At no time was there an intention to break the rules of the city.

Therefore, I request the support to legalize this project according to the standards of the city.

The main reason why I built the porch is to protect the health of my family from the sun's rays. I live with my brother and sister-in-law and their three children. Their children are very sick and the sun affects them a lot. One of them has autism, the other has canaban is a disease that causes total immobility of the child, therefore it is necessary to constantly transport him in the car to the doctor and the high temperatures of the car affect him remarkably.

Respectfully,

**Erick Ballardo Cordon y Cordon
