

Dear Sir Madam

My wishing to apply for the wall movement is due to several reasons:

Due to the wall not being close to the property perimeter we have many people within the neighborhood, walk on the rocks in front of the existing wall, although it is my property and let their pets foul.

I have requested many workmen who sit under my tree to move, due to it looking very untidy when they depart, leaving candy and chip wrappers

I also have individuals walk over the rocks to peer over my wall into my backyard and pool area, the height of the wall is 5' 8" however they are able to do this due to the land having a 6-inch gradient from the sidewalk to my wall this results in the physical height being 5ft 2in high.

I request that my wall height remain the same 5' 8" (the adjacent wall is 6' 4") it will be closer to the sidewalk which negates the gradient.

The walls construction will be concrete block construction with rebar and concrete backfill.

It will have a stucco finish to match adjacent walling as close as possible

It will be painted to match existing color scheme

The whole reason for the movement is due to a privacy issue.

Presidents are already set within the community where walls are adjacent to the sidewalk.

in my case, I am wanting to put a 16 inch border of  $\frac{3}{4}$ " rocks between the sidewalk and the new wall position for aesthetic reasons

Yours Faithfully
