Request a Variance

Salome Hernandez

City of Las Vegas,

The purpose of this letter is to request a variance. We've built the north porch to block the sun from hitting us whenever we're in the backyard and to protect our fancy pool table and to have some shade for when we come to the backyard for a cookout or when we have family, guests over and enjoy a good moment of human interaction. The west porch was installed because we've been broken into twice already before that. There would be times when we would see people look over and see what we had so I believe that was the root cause for why we've been broken into. We installed it so they would no longer be able to see all our work tools, equipment etc. and to also protect it from rain, thunderstorms and sunlight. Both porches have been of great use to us. Sure, it might not seem like a lot of explaining of why we have it and why we should keep it but I'm not going to make anything up and try to sound persuading and lie to you guys. It's all simple. It all comes down to how it has come in handy to protect all our work equipment and from being broken into. I would gladly appreciate if you would let us keep this cover patio, you are more than welcome to come look and see what we have stored and why we have it the way we do. Thank you

Sincerely,

Saul Olguin
